- How many years of relevant full-time (non-internship/co-op) software engineering experience do you have? 43
- Strongest Coding Languages: python, java, c, bash
- Meta really is an awesome place to work, what made you want to respond to chat or work at Meta? You found me.
- Have you ever interviewed with Meta (or Facebook) in the past? No
- Are you actively interviewing and do you have any deadlines (pending offers, time constraints, etc)? If so, what are the dates and with which companies? Actively interviewing, no pending offers.
- Out of the two types of interviews below, which do you have the most experience in? Systems Infrastructure
- Do you know anyone personally or professionally who currently works at Meta that could speak to how awesome you are? Is so, please list their names: No
- What types of teams or projects do you think would be of interest to you? Anything at <https://ai.meta.com/>
- Would you like to move forward with the technical screening interview in the next month or how long would you need to prepare? (Candidates take anywhere from 3 weeks to 2 months to prepare, we want you to have the time to perform your best): We should probably discuss this on the phone.
